DETAILED ACTION

1. Claims 1-22.

Allowable Subject Matter

2. Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance:

3. The cited prior art, Matsuzaki, Matyas, Numao, and Uchiyama teach public key encryption methods and methods of generating public key private key pairs. The cited prior art fail to teach the claimed method of key generation wherein a number g is determined between 0 and n^2 that satisfies one of two conditions: g is invertible modulo n^2 or $\text{ord}(g, n^2) = 0$. The cited prior art also fails to teach the number g being utilized to create a cryptograph c where $c = g^m \bmod n^2$. As a result, the cited prior art fails to anticipate or render obvious the above cited claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
